Jail wait for murder fugitive

A Chinese fugitive arrested in Hong Kong in connection with the slaying of his teenage neighbour in California told a court yesterday he will not fight extradition to the United States.

Shi Deyun, 44, told a magistrate several times that he was willing to be sent back to the United States as soon as possible, adding that the allegations against him were not true.

Shi arrived in Hong Kong on Saturday afternoon on a flight from Los Angeles.

Police, acting on a request from US officials, apprehended him at the airport.

Police scrambled to reach Shi after being notified by US counterparts when he was about the flight, detective team Inspector Jonathan Close said.

"We didn't have a lot of time - we acted quickly and got him, very, very quickly," Close said.

Shi was taken to a hospital and then formally arrested early on Sunday.

US investigators believe Shi killed the 15- and 16-year-old boys before fleeing because he was upset his wife wanted a divorce. The two were found with blunt force trauma in their home in Arcadia, Los Angeles County. Investigators claim he assaulted his wife, who is the sister of the dead boys' father, on Thursday.

When the magistrate asked if he agreed to extradition, Shi said through a Putonghua interpreter: "I consent as soon as possible."

Shi applied for bail, saying he could offer a "high amount of bail money" because he had assets in the mainland and the United States.

Shi said he had not been fleeing but was travelling through Hong Kong to deal with business in Shenzhen.

The details of the allegations against Shi are not true," Shi said. "But I'm not inclined to go into the details and give a rebuttal here. I believe I will restore the truth in the US with supporting facts."

However, chief magistrate Clement Lee Hing-on refused his application for bail and he was remanded in custody.

The hearing was adjourned until February 11 pending a full extradition request from the United States agency.

Poll finds glum's the word here

Adeline Mak

The government was yesterday urged to reach out to the younger generation after a survey showed that Hongkongers are the least happy compared with people living in Osaka and Seoul.

Last year, the survey by City University included Singapore instead of Osaka. But the change in cities did little to raise Hong Kong's happiness index.

College of Liberal Arts and Social Sciences associate professor Dennis Wong Sing-wing, who led the research, and youngsters in Hong Kong were the least happy among the three cities.

Researchers polled 3,453 people in the cities this month and found the happiness of Hongkongers measured 6.83 out of 10, 0.15 lower than last year.

Residents of Osaka are the happiest at 7.41, with those in Seoul rated 7.01.

Wong said Hongkongers are least happy with housing conditions (rated 4.05), politics and society (4.33) and the environment (4.8).

Interviewees were asked to give scores on their satisfaction in six different areas - the economy, environment, housing, public health, politics and society, and leisure and entertainment.

Wong said the dissatisfaction with housing could be attributed to a shortage of public housing, exorbitant prices and ineffective government policy.

Hong Kong's housing score of 4.05 was far lower than Osaka's 4.45 and Seoul's 6.19. Wong said the Japanese

These Hongkongers see the bright side, but sceptic in Osaka and Seoul are generally happier, says the survey.

and Koreans also enjoy a better environment as most live on the outskirts of urban areas and suffer less pollution.

In the area of politics and society, Hongkongers' dissatisfaction with the government probably arose from a series of controversial issues such as excessive lead in drinking water, the lack of universal retirement protection scheme and the Copyright (Amendment) Bill 2014.

Hong Kong's scores for five of the six areas of the quality of life fell, the exception being public health, which showed a slight improvement at 0.13.

Wong said this was probably linked to the increase in the health-care voucher.

While the aged below 24 in Japan and South Korea are happier than other age groups, the happiest in Hong Kong are those aged 65 or above.

Wong said youngsters here are probably less happy due to criticism of the government on social media.

"The government should not neglect young people but should make better use of social media to communicate with them in an open-minded manner. Communication is especially important in the post-Umbrella-movement period."

Wong said the difference may also be attributed by a heavier economic burden borne by young people in Hong Kong in the pursuit of study.

He said that while students in all three places face huge study pressure, the university entrance rate locally is much lower than in Japan or South Korea, while those taking associate degrees are burdened with tuition fee debts.

Relocation of Sha Tin Sewage Treatment Works to Caverns
 Stage 3 Public Engagement Activity

Community Group Meeting

Your photo session and videos are welcome

To participate, please:
 1) Register through the hotline (Tel: 2142 2294) or
 2) Submit a completed registration form by email, fax or post.
 The registration form can be downloaded from the project website (www.ST3TWuCaverns.hk). Successful applicants will have priority assistance for holding Disruptive Activities Arrangement.

Transportation will be arranged for successful applicants from 8:00am to 10:00am on the date of the meeting. The gathering points will be at Tai Shui Hang Village Car Park and Hang Tai Kwai (near the entrance of Kwei To Shopping Centre).

The date and time of the meeting will be announced through the project website.

East and West relief set after MS increases

Yupina Ng

The Chinese University of Hong Kong has launched a pilot program to manage fatigue and cognitive deficits associated with multiple sclerosis and related disorders in 100 patients using Chinese and Western medicine.

It comes amid increasing evidence that the demyelination disease in the central nervous system could lead to disability.

Associate professor of medicine and therapeutics Alexander Lau Yak-lan said the prevalence of multiple sclerosis has increased from 4.8 per 100,000 in 2008 to 6.8 last year, an increase of 40 percent.

At least 500 people were diagnosed with the disease in Hong Kong last year, with 70 percent of them female.

Its cause remains unknown but Lau believes the disease occurs when the immune system attacks insulating covers of nerve cells in the brain and the spinal cord.

Currently, oral medication and infusion biologics can prevent relapses, but more than 80 percent will still suffer from fatigue and 50 percent from cognitive deficits, both of which are difficult to treat with Western medicine.

"Once the nerves fail to transmit signals properly, responsive functions are disrupted," Lau said. "That results in a wide range of symptoms, including blurred vision, muscle weakness, memory loss and bladder difficulties. The symptoms are difficult to treat. The physical impairment disables patients' mobility, problem-solving skills and self-care ability, resulting in a poorer quality of life."

Chinese University researchers will use Chinese and Western medicine to manage multiple sclerosis symptoms. STAFF PHOTO

Professional consultant William Cheung Ho-ning, of the university's Hong Kong Institute of Integrative Medicine, said both Chinese medicine and acupuncture will be used to manage symptoms.

"Traditional Chinese medicine aims to balance the body's condition, and acupuncture is an effective treatment modality in mind-refreshing, dredging meridians, relieving numbness and improving coordination," he said.

Selected patients will receive an eight-week prescription of Western and Chinese medication, including a daily herbal medicine with suitable patients also receiving twice-a-week acupuncture treatment.

A first consultation will cost HK\$450.

Before the program launch, about 30 patients had received the integrative medical care jointly managed by neurologists, Chinese medicine practitioners and nurses.

Doni Kwok Ho-lun, 26 was diagnosed with the disease in 2014, but his vision and speech has improved since the new treatment.

"I had blurred vision, muscle weakness and slurred speech before," he said.

Kwok added that since taking the new treatment he has regained normal vision and his speech has improved.

病人「行得耐咗順咗」

中西合璧療法治多發性硬化症

視力模糊、肢體無力、記憶力減退和排尿障礙等，都是患上多發性硬化症的病徵。此症為最常見的中樞神經系統疾病，一般以西藥治療為主，香港中文大學醫學院結合西藥、中藥和針灸治療，有病人這種中西合璧療法後，病情改善。

據有二百五十萬名多發性硬化症患者，全球發病率顯示，本港○八年至一五年間，由每十萬人中有四至八人患病，急升至每十萬人中有六至八人患病，并繼續增加。估計已有五百人確診。

多發性硬化症在發病初期，病徵大多會於每次發病後緩解。若不及早診治，重症病人會出現不同程度的殘障。現時本港對此症的治疗方法以西藥為主，但有八成患者用藥後感到疲勞，四五六成患者亦感到認知能力受影響，嚴重者更需自行下牀行走，自理能力大受限制。

中藥及針灸亦有改善多發性硬化症的作用，陳偉良與八月開始，為合德患者進行中西醫治療。初步評估發現，他們於疲勞乏力、手足麻痺、認知能力上有較明顯改善。

患者Gary稱，曾發病兩次，嚴重時連行走十分鐘的距離，亦要上一小時去行。接受中西醫結合治療後，情況有改善，「行得耐咗順咗」，中大將開展一項針對此症中西醫結合治療先導計劃，為一百位合德患者，同時使用西藥治療，及進行八周中藥及針灸治療，期間評估及區中西藥物相輔的可能性，每劑費用約四百五十元。

防水物料可致癌 環團促停用

環保組織綠色和平日前指，十一個戶外用品品牌共四十款防水產品，九成被驗出不同類型的可致癌有害物質全氟化合物(PFCs)。當中一款含有害物質的長褲，含有性更高出鄰苯二酚十倍的有害物質。團體呼籲消費者留意產品標籤，並要求政府立法監管。

綠色和平項目主任朱江(圖)表示，四十件樣本中，共三十六件驗出含PFCs，其中一款長褲有一款行山鞋來自本港，兩者驗出每立方厘米含二點四七微克的「長鏈PFCs」，超出國際標準近二點五倍；前者所驗出由吉列及摩發性PFCs。

朱江說，PFCs屬人工合成化合物，會在工業生產過程中進入生態系統。最後經食物鏈進入人體累積，有機會影響内分泌及免疫系統。該等罕見癌症及癌症，但市民使用有關產品時，一般不會有直接影響。

朱江說，消費者應留意PFCs，並要求政府立法監管訂立標準，保障市民健康。

陳茂波：丁揸工屋不可混一談

去年的「賣丁案」中，多名居民投訴申請許諾罪名成立，事件引起各界廣泛關注。發展局局長陳茂波強調，會對建成的丁揸屋實施嚴格執法。

新界發展局昨在多份報章刊登一封給發展局局長陳茂波的公開信，要求政府就居民丁揸立場，以及「賣丁」違例行為作正面回應。

陳茂波回應，丁揸及丁揸屋不可混為一談。會中若丁揸買賣涉及申請執照，當局會嚴格執法。主要留意到有關居民的公開信，但指出由案件可理解丁揸，現請居民互諒。

"wazzock"

I hope our Legislative Councillors will learn from the MPs and use words instead of banane.

在香港，立法會議員會向政府官員去擲物件以表達意見。在美國，國會議員則用語言來表達意見。我認為，用言詞比擲物有效。上星期，國會議員在國會辯論，英國應否禁止美國總統候選人入境，白蘭芝若獲選獲總統，將會限制穆斯林進入美國國境。我有五十萬名英國人(Britons)聯名要求禁止他進入美國國境。這論和章烈(Heated)。但國會議員並沒有像我們的立法會議員般咆哮、喊叫、或舉起示威標語。他們用言詞來提出訴求。

國會議員用了不同字眼來侮辱特朗普。我最喜歡的一個，是一位女議員用「侮辱」的詞。風雨即是「wazzock」。它是「風」和「雨」的組合。這字於九十年代在英國年輕人(young Britons)當中相當流行，但現在已很少用。它解作「食言或背棄」。有些議員則用「侮辱者」(demagogue)。它是指某人，尤其是政客，以煽動、種族性與語言來煽動人心。看特朗普就是個demagogue。國會議員也特別喜歡用这个词。

大部份國會議員都於辯論期間批評，特別針對他一旦當選，將會禁止穆斯林進入美國國境。但大部份議員也說，他們不會禁止他進入美國。他們說，即使特朗普是個煽動人心的政客(demagogue)，因為某人的政治立場與他們是相反的，與他認同。人們有言論自由，即使你不喜歡他們所說的。我認同特朗普是個「wazzock」，但他有權利。若他當選後禁止穆斯林入境，若美國人不支持禁制穆斯林，那他們可以選擇不去投他一票。我希望我們的立法會議員可以學效美國國會議員，多用言詞而少用暴力。中譯：七刻
